Spanish: Native
English: Upper-intermediate

EDUCATION

Technical High School Diploma in
Computer Science - Private Institute
JUAN XXIII.

Full Stack Web Developer-Henry
Bootcamp.

SOFT SKILLS

- Autodidact
- Flexible
- Communicative
- Creative
- Cooperative

ABOUT ME

I am a Full Stack Web Developer with a technical degree in computer science. My passion for technology led me to become a passionate self-learner. I am always looking for opportunities to learn and enhance my skills in the field of web development. My main focus at the moment is to specialize in Front-End, where I can bring creative designs to life and create interactive and intuitive experiences for users

EXPERIENCE

CarGo (Car Dealership)

Associated with Henry

CarGo is a digital platform for car sales that offers users the possibility to search, explore, and purchase new and used vehicles conveniently and securely. The project was developed by a collaborative team, applying the agile Scrum methodology, which enabled iterative and collaborative delivery throughout all stages of development. Technologies Used:

React - JavaScript - Vite - Express - Tailwind CSS - Node.js - Redux - MongoDB - Mongoose

TRAILERS

Is a modern web application designed for movie enthusiasts who want to explore and enjoy the latest movie trailers. Developed using JavaScript, React, an external API, and powered by CSS for design, this platform provides a simple yet captivating experience for film enthusiasts.

Intuitive User Interface: I've created a user-friendly and welcoming interface that allows users to seamlessly explore a wide variety of movie trailers. The simple yet attractive design offers an immersive user experience.

Advanced Search: My application enables users to search for specific movies in an external API, making it easy for them to find and watch the trailers of their desired films.
